

STANDARD STAND CONSTRUCTION

The standard construction includes the following elements:

- walls up to a height of 2.5 m separating the rented area from neighboring stands of other EXHIBITORS;
- floor covering in gray;
- a frieze line from each open side of the stand;
- an inscription with the company's name (maximum 20 characters per page) made in black with a font set by the Fair Organizer;
- stand number;
- electrical installation (230V) (ie 1 electric socket on the stand and 1 lighting point for every 3 m² of the stand);
- 1 showcase with dimensions 100x50cm and height 100cm;
- 1 table;
- 2 chairs;
- clothes hanger (system) mounted on the wall;
- trash can.

The standard exhibition stand construction is made in the white color OCTANORM system.

Resignation from any element of standard stand construction does not constitute grounds for reducing the price for renting space with standard buildings.

The color change of the floor covering does not impose the surcharge on the EXHIBITOR. A sampler of available carpets The Fair Organizer will make available to the EXHIBITOR at his request. The Fair Organizer should be notified of the color change of the liner by **11/09/2023**. Applications to change the color of the liner sent to the Fair Organizer after the set date will not be implemented for logistical reasons.
